**Restriction:**

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-13, drawn to application user interface, classified in class 719, subclass 329 and class 345, subclass 347.

II. Claims 14-44, drawn to system and method for processing email, classified in class 709, subclass 206.

The inventions are distinct, each from the other because of the following reasons: Inventions I and II are related as combination and subcombinations. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination II as claimed do not require the particulars of the subcombination I as claimed because a conventional email application can be used in the invention II. The subcombination I has separate utility such as auto-filling feature for composing emails more easily.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of

their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
